

TIMEMORE Coffee (TIMEMORE) is co-founded in 2012 by several coffee lovers who also love designing and R&D. We specialize in designing and developing of original hand-made coffee equipment. We believe in the magic power of designing. Each product we deigned is based on profession and aesthetic, which is to make each product with irreplaceable functions and esthetics value

Currently TIMEMORE is recognized by many professions and coffee lovers. Chestnut G1 won the Reddot Award of 2017, which shows the design power of Chinese coffee lovers and also inspires us to design revolutionary smart high-tech products. We hope these products bring you some choices of lifestyle about beauty, coffee or beautiful stories.

Black Mirror

Dual sensors: measure water as well as coffee simultaneously
Combines a scale with a drip stand

Chestnut G1 / Slim / Nano

Dual-ball bearing to fix the central axis perfectly
Adjustable coarseness to suit more brewing methods

Crystal Eye Dripper

Revolutionary 3 layers of extractions
Concaved wall for more smooth extraction

Fish 03 / 04 Kettle

Professional Pour-over kettle with smooth water flow
Patented spout to control water easily

TIANMU Pourover Kit

Combine the beauty of coffee with oriental aesthetic.
Special V shape for fuller extraction

WHAT ELSE IMAGINATION

DO YOU HAVE ABOUT SMART POUR-OVER KETTLE?

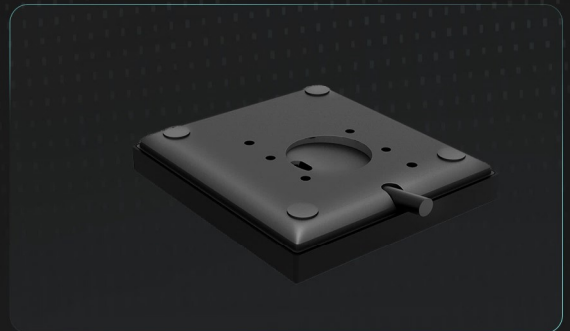

Heating Faster

Smart Connection
via Small Program/APP

Unique design of the wire connection
under the panel for aesthetics

Setting Temp. with sliding touch
Dual digital screens for intuitive operations

Thin/thick spouts for different options
You can choose one or both.

British STRIX Temp. Controller to
control temperature accurately

只为咖啡之美
TIMEMORE COFFEE (SHANGHAI) CO.,LTD

BLACK MIRROR

SMART COFFEE SCALE WITH DUAL SENSORS

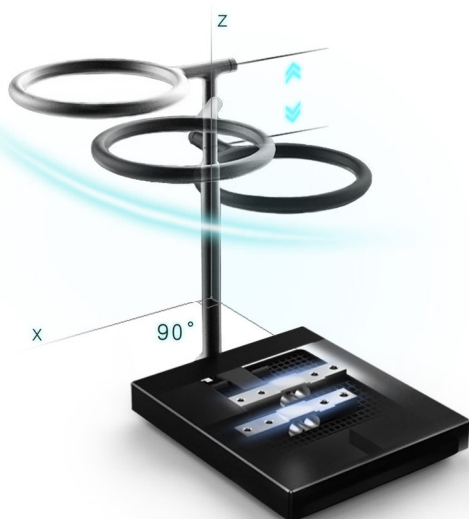

THE “BLACK” TECHNOLOGY FOR POUR-OVER COFFEE IS COMING SOON

黑镜

BLACK MIRROR
DUAL SENSORS SMART SCALE

Dual Data More Profession

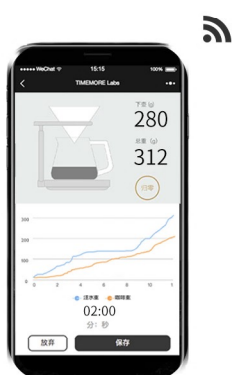

Made for accurate coffee pouring over
Measure water and extracted coffee simultaneously

Patented Dual Chips

Patented first Original design with two sensors
Weigh water and extracted water simultaneously
Patented ID: 201720795248.0
Global Patent protection of PCT

The height and angles of the drip stand are adjustable.

Smart Connection

Connect it with smart device via Bluetooth /Wifi
Get the dual weighing graph and more smart functions

Detachable Bracket

Insert detachable bracket and switch to
dual-sensor mode automatically.

SINGLE SENSOR

Mode: Single mode
Measure: Water
Support: WIFI & Bluetooth
Bracket: None

DUAL SENSORS

Mode: Dual mode/Single mode
Measure: Extracted coffee & Water
Support: WIFI & Bluetooth
Bracket: Included

ACCESSORY FOR ESPRESSO

Mode: Dual-sensor for Espresso
Measure: it gets into Espresso Mode with the accessory plugged in. You can weigh espresso in both shot glasses

TIMEMORE Black Mirror Dual-Sensor Smart Pour-over Weighing Panel

Shanghai TIMEMORE Coffee Equipment CO., LTD.

Just for the Beauty of Coffee

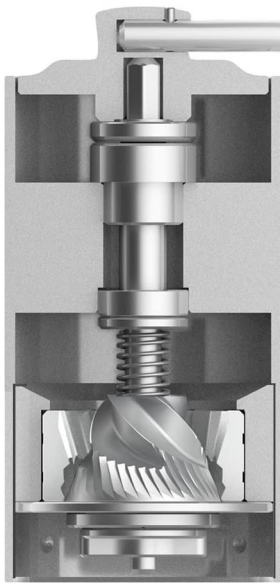

Challenge Top Hand Grinder with our Design Power

Unibody-design of Aluminum and Walnut wood

Aluminum body and Walnut wooden container are cut in unibody. Black, Silver or Golden are for your options. Walnut wood are cut by CNC with premium quality. Its natural patterns are clear with several polish. They are as elegant as handcraft.

Dual Bearings to fix central axis

Two ball bearings to fix central axis
Make 2 bearings rotate consistently and smoothly.

High Hardness steel burr set

Highness: HRC58 (Sharp steel burr)
Cut beans fast and uniformly

Creative hand grip

Unique design round inside and square.
outside inside of traditional cylindrical shape.
Not only make an elegant design.
but also keep your hands from losing grip of it.

Point to Point coarseness scale

With steel ball damping structures.
Adjust coarseness precisely

Original Design based on good User Experience

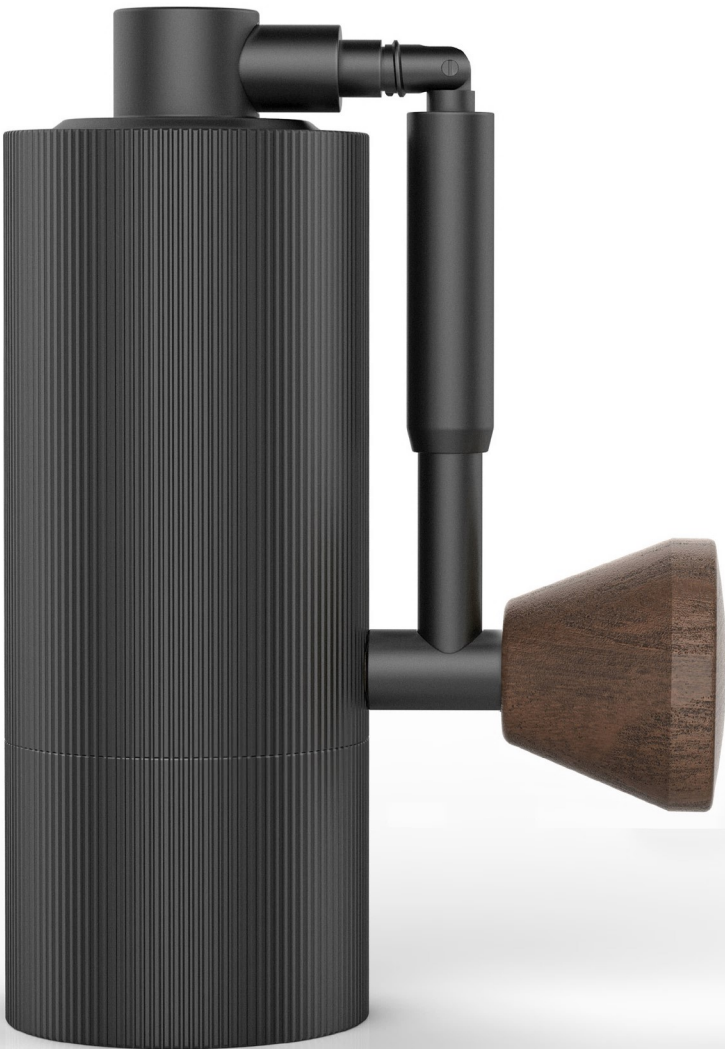

It's smooth and easy to use with damping structure in the lid,
adjustable scale and the Plug-in container.
No block in the enter of beans with capacity of Max. 30g
It comes with a cloth bag. Enjoy coffee at any time.

CHESTNUT G1 MANUAL COFFEE GRINDER

Shanghai TIME MORE Coffee Equipment CO.,LTD
Just for the Beauty of Coffee

A Portable Minimal Manual Coffee Grinder with Premium Quality

Nano / Slim

Black or Golden with Wooden Knob
Robust Aluminum body

Capacity : Nano 15g (Foldable)
Slim 20g

Elegant Patterned body with higher friction.

Automatically Foldable Structure

Patented spring foldable construction brings you precise elastic power and lock itself aromatically when you fold it, which makes it convenient for you to put it away and carry.

Minimal size

Its body is only 10cm. We try our best to decrease the unnecessary room in the grinder.

Easy to control three pour-over ways

900ml

Special spout like Pelican' s mouth

Easy to control water flow
 Compatible for fast brewing with big water flow
 Slow brewing with small water flow
 drip brewing with waterdrops

Walnut-Like plastic handle

Stainless steel body fits classic wood-like hanle
 Special ergonomics design with good hand grip
 larger distance between hands and the body
 It wont scald your fingers

Support Japanese drip way

Easy to make
 straight slim water flow

Even easy to control
 big water flow

Patented inner construction to stabilize water

The inner construction makes the water fluent and stable
 without effect of liuid' s movement.
 Patent ID: 201630023927.7

High temperature ceramic coating

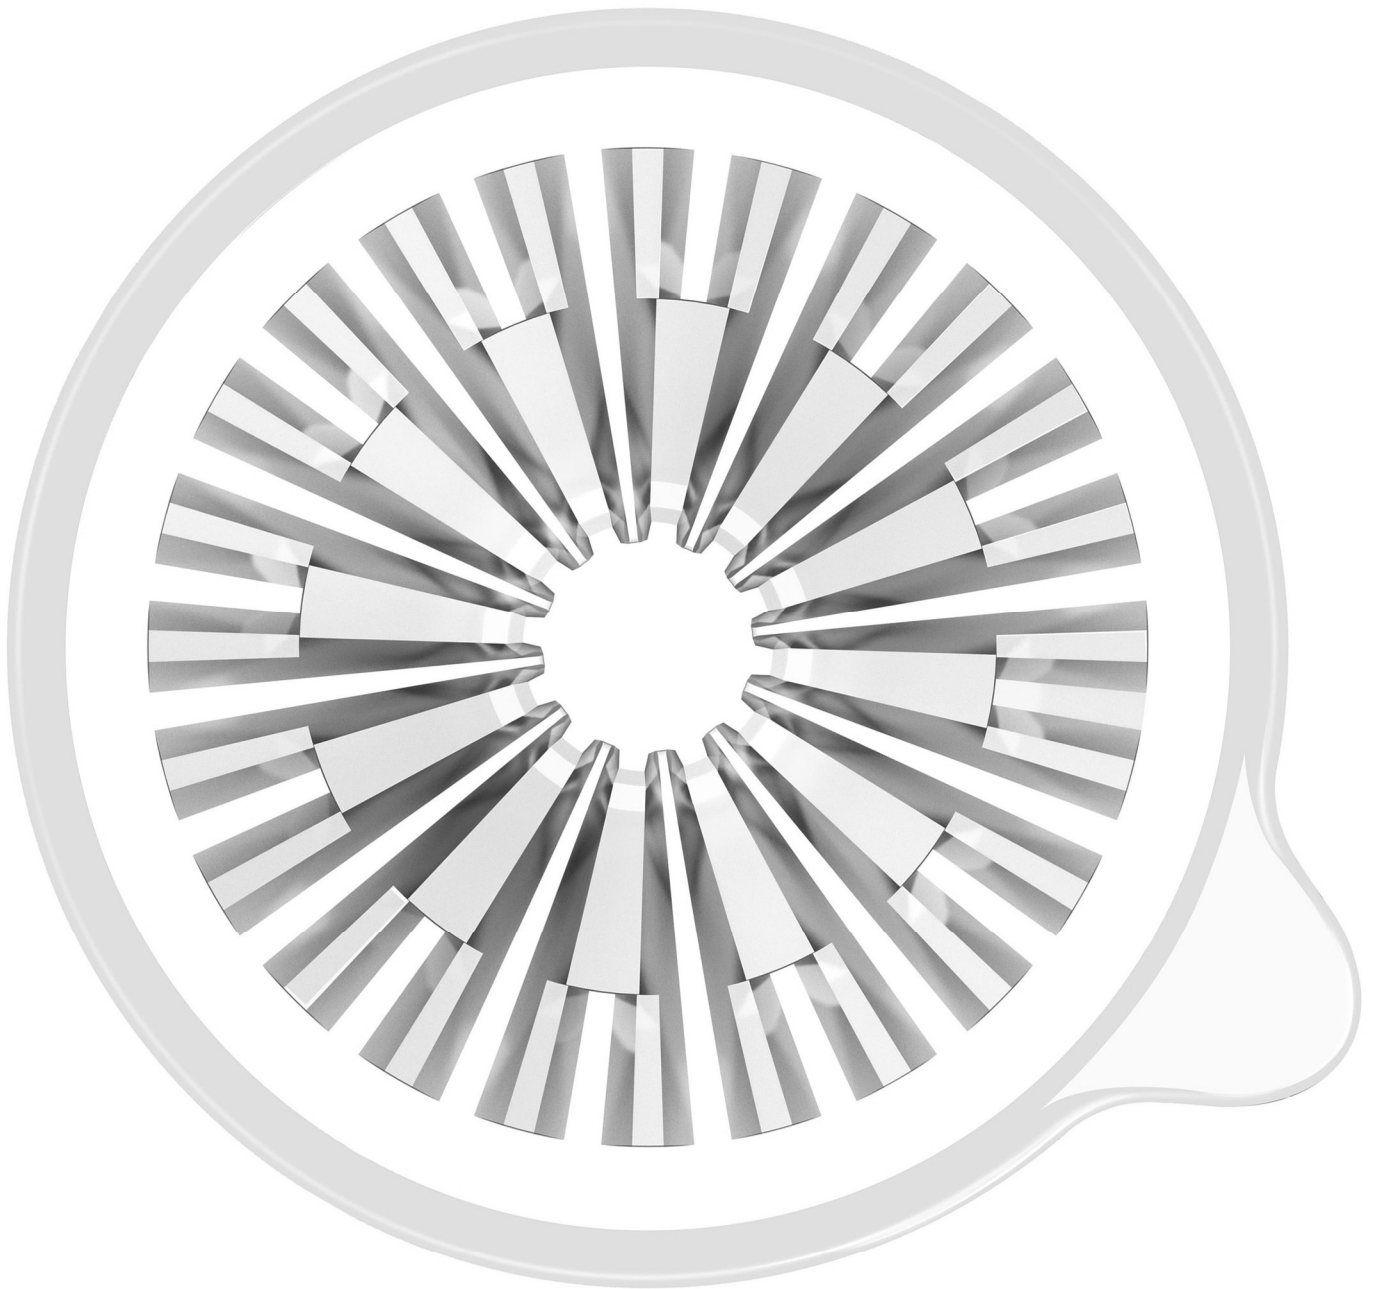

Good polish with metal lustre
 High hardness and high temperature resistance
 healthy 304 Stainless steel body without harm to human

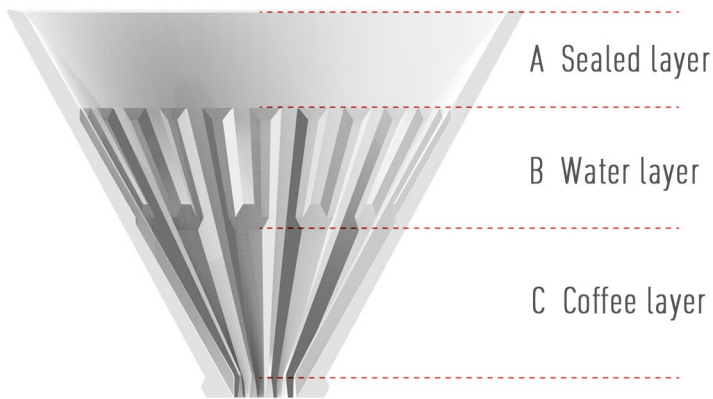

FISH 04 POUR OVER KETTLE

Shanghai TIMEMORE Coffee Equipment CO.,LTD
 Just for the Beauty of Coffee

New Standard of extraction with professional spirit

A Sealed layer

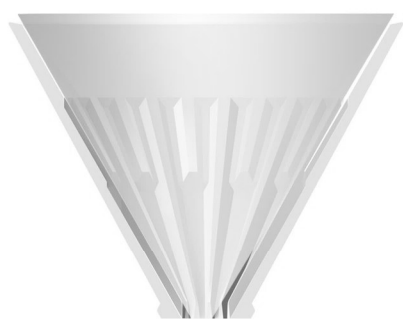

Filter paper fits dripper perfectly. There is no groove between them. Water can't flow from this layer. It restricts water when you pour in a larger water flow.

B Water layer

It's recommended to pour over within this layer. The area of the concaves is gradually reduced to control the flow rate.

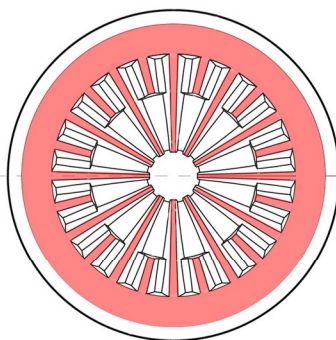

C Coffee layer

15 / 20g ground coffee will just cover this layer. There are not many ribs in this layer but more grooves. It's similar to the flannel-like extraction.

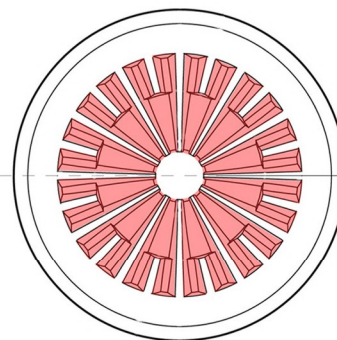

Extraction in 3 layers

Good fit shows clearly constructions in 3 layers. Even beginners can pour over easily by viewing the construction.

Closer fit with paper filter

Colored area means the area that filter paper fit the dripper. It ensures close fit between filter paper and the dripper. Therefore, the shape of coffee ground after brewing is round and full. These will help with a

Smoother Permeability

Colored area means the groove that water run through. Its area is more than other dripper's. It allows smoother Permeability. With a better permeability, you don't have to worry about the over-extraction of slow water-flow.

CRYSTAL EYE DRIPPER

Shanghai TIMEMORE Coffee Equipment CO.,LTD
Just for the Beauty of Coffee

Secret of 90° water flow

Made for one cup

Capacity 300ml.
Dia of spout 4mm.

Made for cafe or profession

Capacity 900ml
Dia.spout:6mm
Adjustable Water flow
Comfortable hand grip

Easy to pour 90° water flow straight down

Patented Spout

Patent certificate NO:201620199042.7

Body :304 Stainless steel
Coated with three layers of
Teflon coating in 1300°C
Wear-resisting and Durable
Healthy, Tidy and Clean

Steady water flow structure
Special design makes water
flow fluently with no effect
from the water pressure.

FISH 03 POUR OVER KETTLE

Shanghai TIMEMORE Coffee Equipment CO.,LTD
Just for the Beauty of Coffee

Define the beauty of coffee with Oriental aesthetics

Dripper

Designed for coffee extraction. Perfect angle to fit filter paper well

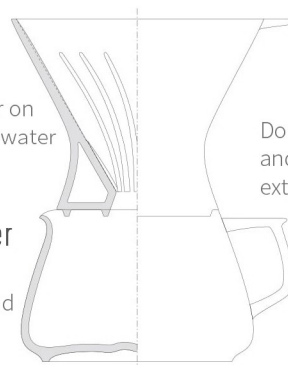

Server

Comfortable hand drip due to its flat design and proper size

Slop basin

After extraction, place the dripper on it to contain left water

Double walls keep warm and also make sure the extraction stable.

Cup and saucer

Thin rim is with comfortable hand grip.

Three colors for your options

● Black

It feels like ancient black metal and looks old like an antique.

● Celadon

White & light green. Famous glaze from Jingdezhen with Chinese Aesthetics

● Matt white

Matt and elegant Classic and modern simplicity reflex coffee's color

Created by TIMEMORE and famous potter in Jingdezhen

WEI TONG

- Chief designer in Shanghai Renjian ceramics
- Designed the ceramic instruments named "Yao Yue" for Mr. Tan Dun
- Design director of Zhenrutang in Jingdezhen
- Brand founder of Wei design

YU YUE (Fish)

- Current design director for TIMEMORE Coffee
- Senior industrial designer with Master degree of Industrial Design
- Former Product designer for CREATIVE, ZTE and other multinational companies
- Won the Red Dot (REDDOT) Supreme Award

Light design

See the nature of original material without decoration

304 Stainless Steel Bracket

Premium quality bracket are made of 304 stainless steel in food - grade. It' s coated with High-temp.Teflon. It looks frosted and matt with long durability.

Ebony base

The base is made of a whole piece of ebony and polished carefully. Its texture feels good and the construction of the wood is tight and uniform. Its color is dark and elegant with no special smell. It' s corrosion-Resistant and durable.

Minimal design

Strong metal bracket and practical silicon pad.
Exquisite wooden base with Nicely polished edge
These features give us dark and elegant coffee aesthetics

Available for the New coffee server

Borosilicate glass is high and cold temperature-resistant. Feel free to contain hot or cold water. Minimal design with sharp finish. Its handle is thicker with better and more stable hand grip.

● 360ml

● 600ml

Dual filters with less fines

One more filter Purer extraction

It's a Unique design of dual filters. The first filter is 80 mesh at the bottom and 120 mesh filter on the lid to block more fines again. It makes purer coffee in a fast and easy way. (Noted: this design still cant block 100% of fines.)

Compatible for coffee or Tea

Switch the meshes on the lid to choose the right mode. One pot with two functions.

Better material

Matt Teflon coating without fingerprints or water marks.
High quality 3mm borosilicate glass withstands 200°C
Premium stainless steel mesh extracts purer coffee.

Redefine
the new standards of Syphon coffee industry

Withstand 1000°C instand Temp. Change 

It took 2 years to find the right material to withstand such high Temp. Sometimes users cool the lower pot with wet towel immediately when they turn off the burner or burn it for too long till water is gone completely. The lower pot may crack because of these wrong steps. No need to worry about it with our XTREMOR Syphon coffee maker.

Black ebony handle and stir stick 

The handle and the stir stick are made of black ebony. It's as exquisite as handcraft with tight texture. We'd like to make every detail perfect from product to packages.

Patented Anti-scratch base with silican pad 

We try to consider every detail when customers use it. The patented silican pad is with unique design. It not only looks better but also protects your table and beamer's surface. Its enlarged base is compatible for more heating devices. (Patent ID: 201520038482.x)

Redefine the stands of coffee industry

TIMEMORE focuses on designing unique and practical coffee equipment. We try our best to challenge the limits of hand-made coffee equipment and offer the best solutions of Syphon coffee makers.

XTREMOR SPYPHON COFFEE MAKER

Shanghai TIMEMORE Coffee Equipment CO.,LTD
Just for the Beauty of Coffee

We are so
Fascinated with
the beauty of Syphon coffee

Food-grade hand-made glass

Withstand 210°C of instant temperature change, which is 30% higher than average one. Safely glass meets food-grade standards. It's very secure to use it.

A silicon pad at the base to protect the table and beamer

Traditional base is very hard and may scratches the surface of the table or beamer. Therefore, we installed a silicon pad to the base. It's not only nice and skidproof but also protects your table.

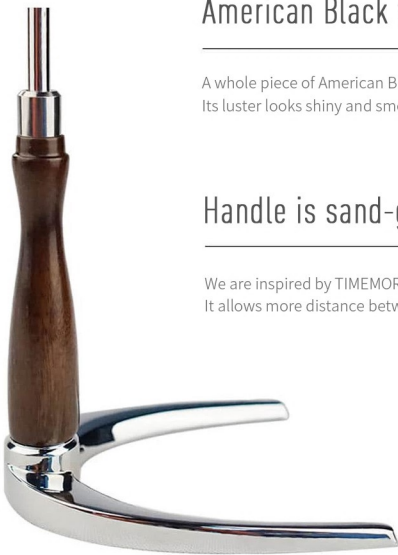

American Black walnut Handle

A whole piece of American Black walnutwood is cut by CNC. Its luster looks shiny and smooth with warm hand grip.

Handle is sand-glass-like

We are inspired by TIMEMORE logo and designed this special shape. It allows more distance between fingers and lower pot, which is safer for users.

Enlarged base to fit more heaters

Beamer

Gas burner
